

Mockup Review Notes

I told Hanna that the color scheme for the background should be lightened to be more of a pastel. This is more of an aesthetic choice. I also recommended her addition of more sources to correspond with the pictures. She asked if this should be in the footer and if I'd prefer for the footer to include these sources, to which I replied that yes, this would most likely be a better way of incorporating this information.

We also discussed getting rid of an image of a salamander "loch ness monster" which did not go with the other images. I recommended getting rid of it as it distracted from the information due to how different it was from the others.

We also discussed the translation to mobile and editing the menu; in this case, getting rid of the Source page and the source on the menu, then seeing if that should be made larger.
