Html Review Notes

Some possible areas for improvement would be:

- Add a space between Loch and Ness on the homepage.
- I would also try to format the pictures for the Origins section to be for web, as they are not fully loading.
- Under Hoaxes, I'd fix the punctuation after "The Ultimate Experiment"- Mainly check punctuation and spelling throughout the document to make it seamless.
- The background color would benefit from being more pastel, or made to be lighter in shade.
- I would change the color of the text (excluding the headings) to be a gray color to contrast the green and pastel blue. Consider #557A79, but this could also be #89B7B5 or lighter, depending on how it appears against the lighter pastel background.
- Add an icon for the left of the information bar at the top.
- I would also consider formatting this to be adaptive, meaning for phone as well. This is secondary to the above changes.
